GREEN WARRIORS REPORT

Green Warriors Engineering is not merely knowing and being knowledgeable, engineering is not merely analysis, engineering is not merely the possession of the capacity to get elegant solutions to non-existent engineering problems, engineering is practicing the art of the organized forcing of technological change.

Aurora's Technological and research institute conducted GREEN WARRIORS awards of PAKURTHI RAKSHAKA AWARDS for the academic year 2016-17 on 30th august, 2017. This award is presented to NSS unit of our college for the extraordinary work done towards conservation of environment.

LSF has started ECO-Clubs in a few schools and schools conducted various awareness programs in these schools. LSF also organizes Camps, Biodiversity camps and Adventure forest camps.

Green Warriors is youth environmental leadership campaign which is designed by Lee Shreyu's Foundation and Synergy Welfare Society, where we involve both school and college students for promoting sustainable environment practices.

In campaign we train the volunteers to become young leaders for the next generations. We also promote them to involve themselves in research works. The trained volunteers also gave field works for practical expense. Apart from the environmental education these volunteers are also given training in communication skills. The Green warriors will support all the volunteer work in the society. They would take part in various awareness campaigns organized by both Government and Non-Governmental Organizations.

The best volunteer work is recognized at the end of the year and a special appreciation awards are given to them. Recognizing the efforts of NSS Volunteers and program officers towards the conservation of nature every year LSF has been giving these awards. Our IVth year ECE student S.Bhanu Chander attended this award function and collected this award.
